Birthdate: 06/23/2002

Test Steps

1. Open the PrestaShop demo website.
2. Verify that the Home Page is loaded successfully.
3. Click the Clothes category from the main navigation menu.
4. Verify that the Clothes category page is displayed.
5. In the left-side filter section, select the Discounted filter under Selections.
6. Verify that the active filter is displayed as Selections: Discounted.
7. Verify that discounted products are displayed with the -20% discount label.
8. Select the first product, Hummingbird printed t-shirt.
9. Set the product quantity to 3.
10. Add the product to the cart.
11. Click Continue Shopping.
12. Select the second product, Hummingbird printed sweater.
13. Set the product quantity to 4.
14. Add the second product to the cart.
15. Go to the shopping cart page.
16. Verify that the cart displays 7 items in total.
17. Verify that the first product, Hummingbird printed t-shirt, is displayed with:
 - Size: S
 - Color: White
 - Quantity: 3
 - Unit Price: €22.94
 - Line Total: €68.83
18. Verify that the second product, Hummingbird printed sweater, is displayed with:
 - Size: S
 - Quantity: 4
 - Unit Price: €34.46
 - Line Total: €137.86
19. Verify that the cart subtotal is displayed as €206.69.
20. Click Proceed to Checkout.
21. On the Personal Information page, select guest checkout.
22. Enter valid personal details:
 - First Name: Ishan
 - Last Name: Premathilaka
 - Email: test1@gmail.com
 - Birthdate: 06/23/2002
23. Agree to the required terms and privacy policy checkbox.
24. Click Continue.

25. Enter valid address details on the Addresses step and continue.
26. On the Shipping Method step, select My carrier.
27. Verify that the shipping cost is displayed as €8.40 tax included.
28. Click Continue to Payment.
29. On the Payment step, select Pay by Cash on Delivery.
30. Agree to the terms of service checkbox.
31. Verify that the order summary displays:
 - Subtotal: €206.69
 - Shipping: €8.40
 - Total: €215.09
32. Click Place Order.
33. Verify that the order confirmation page is displayed.

Expected Result-

The user should be able to successfully browse the Clothes category, apply the Discounted filter, add two discounted products to the cart with selected quantities, verify cart details, proceed through guest checkout, select shipping and payment methods, and place the order successfully.

The order confirmation page should display the message “Your order is confirmed”

The order details should include both products with the correct quantities, prices, subtotal, shipping cost, and final total.

TC-02: Verify Clothes Category Page Loads Successfully.**Preconditions:**

The user is on the PrestaShop Home Page.

Test Data:

Category: Clothes

Steps:

1. Open the PrestaShop demo store.
2. Click the Clothes category from the top navigation menu.
3. Wait until the Clothes category page is loaded.
4. Check the page title and product listing area.

Expected Result:

The Clothes category page should load successfully. The page should display the Clothes title, available products, filter options, and sort dropdown.

TC-03: Verify Discount Filter Displays Only Discounted Clothes Products.

Preconditions:

The user is on the Clothes category page.

Test Data:

Filter: Selections -> Discounted

Steps:

1. Open the **Clothes** category page.
2. Go to the left-side filter section.
3. Expand or locate the **Selections** filter.
4. Select the **Discounted** checkbox.
5. Observe the filtered products.
6. Check whether the active filter appears on the page.

Expected Result-

The page should display only discounted products. The active filter should be shown as **Selections: Discounted**. Displayed products should show a discount label such as **-20%**.

TC-04: Verify Clear Filter Option Removes Discount Filter

Preconditions:

The user is on the Clothes category page and the **Discounted** filter is already applied.

Test Data:

Applied Filter: Discounted

Steps:

1. Apply the Discounted filter in the Clothes category.
2. Verify that discounted products are displayed.
3. Click the Clear all button from the filter section.
4. Observe the product list again.

Expected Result:

The Discounted filter should be removed. The active filter label should disappear, and the product list should return to the default unfiltered result.

TC-05: Verify Product Sorting by Price Low to High

Preconditions:

The user is on the Clothes category page.

Test Data:

Sort Option: Price, low to high

Steps:

1. Open the Clothes category page.
2. Locate the Sort by dropdown.
3. Select Price, low to high.
4. Observe the order of displayed products.
5. Compare the prices of the displayed products.

Expected Result:

Products should be displayed in ascending order based on price. The lower-priced product should appear before the higher-priced product.

TC-06: Verify Product Details Page Opens for Hummingbird Printed T-Shirt

Preconditions:

The user is on the Clothes category page or discounted product listing page.

Test Data:

Product: Hummingbird printed t-shirt

Steps:

1. Open the Clothes category page.
2. Apply the Discounted filter if needed.
3. Click the Hummingbird printed t-shirt product.
4. Observe the product details page.

Expected Result:

The product details page should open successfully. It should display the product name, image, price, discount, size option, color option, quantity selector, and Add to Cart button.

TC-07: Verify Product Quantity Can Be Increased Before Adding to Cart

Preconditions:

The product details page or product card for Hummingbird printed t-shirt is visible.

Test Data:

Product: Hummingbird printed t-shirt

Quantity: 3

Steps:

1. Open or locate the Hummingbird printed t-shirt product.
2. Increase the quantity to **3**.
3. Click the Add to Cart button.
4. Open the cart or cart confirmation popup.

Expected Result:

The product should be added to the cart with quantity **3**. The cart should not reset the quantity to 1.

TC-08: Verify Continue Shopping Button Allows User to Add Another Product

Preconditions:

The Hummingbird printed t-shirt has already been added to the cart.

Test Data:

First Product: Hummingbird printed t-shirt

Second Product: Hummingbird printed sweater

Steps:

1. Add Hummingbird printed t-shirt to the cart.
2. Wait for the cart confirmation popup .
3. Click Continue Shopping.
4. Return to the product listing or store page.
5. Select Hummingbird printed sweater.
6. Add the sweater to the cart.

Expected Result:

The user should be able to continue shopping without losing the first product from the cart. The second product should be added successfully.

TC-09: Verify Cart Displays Two Different Products Correctly

Preconditions:

Two products have been added to the cart.

Test Data:

Product 1- Hummingbird printed t-shirt , Quantity: 3

Product 2- Hummingbird printed sweater , Quantity: 4

Steps:

1. Add Hummingbird printed t-shirt with quantity 3.
2. Add Hummingbird printed sweater with quantity 4.
3. Open the shopping cart page.
4. Check the listed products.

Expected Result-

The cart should display both products separately.

The Hummingbird printed t-shirt should show quantity **3**.

The Hummingbird printed sweater should show quantity **4**.

The cart item count should show 7 items in total.

TC-10: Verify Cart Line Price Calculation Is Correct

Preconditions-

The cart contains the selected products.

Test Data:

Hummingbird printed t-shirt: $€22.94 \times 3 = €68.83$

Hummingbird printed sweater: $€34.46 \times 4 = €137.86$

Steps:

1. Open the shopping cart page.
2. Check the unit price of the t-shirt.
3. Check the quantity of the t-shirt.
4. Verify the line total of the t-shirt.
5. Check the unit price of the sweater.
6. Check the quantity of the sweater.
7. Verify the line total of the sweater.

Expected Result:

The t-shirt line total should be displayed as **€68.83**.

The sweater line total should be displayed as **€137.86**.

The line prices should match the selected quantities and product unit prices.

TC-11: Verify Guest Checkout With Valid Personal Information**Preconditions:**

The cart contains at least one product. The user is not signed in.

Test Data:

Social Title: Mr.

First Name: Ishan

Last Name: Premathilaka

Email: test1@gmail.com

Birthdate: 06/23/2002

Steps:

1. Open the shopping cart page.
2. Click Proceed to Checkout.
3. Stay on the Personal Information step.
4. Select Order as a guest.
5. Select social title as Mr.
6. Enter first name.
7. Enter last name.
8. Enter email address.
9. Enter birthdate.
10. Agree to the required terms and privacy policy checkbox.
11. Click Continue.

Expected Result:

The user should be able to continue to the Addresses step without validation errors.

TC-12: Verify Guest Checkout With Valid Personal Information

Preconditions-

The cart contains at least one product. The user is not signed in.

Test Data-

Social Title: Mr.

First Name: Ishan

Last Name: Premathilaka

Email: test1@gmail.com

Birthdate: 06/23/2002

Steps-

1. Open the shopping cart page.
2. Click Proceed to Checkout.
3. Stay on the Personal Information step.
4. Select Order as a guest.
5. Select social title as Mr.
6. Enter first name.
7. Enter last name.
8. Enter email address.
9. Enter birthdate.
10. Agree to the required terms and privacy policy checkbox.
11. Click Continue.

Expected Result-

The user should be able to continue to the Addresses step without validation errors.

TC-13: Verify Invalid Email Validation in Guest Checkout

Type: Negative Test Case

Preconditions:

The user is on the Personal Information step of checkout.

Test Data:

First Name: Ishan

Last Name: Premathilaka

Invalid Email: test1gmail

Steps:

1. Open the Personal Information step.
2. Enter a valid first name.
3. Enter a valid last name.
4. Enter an invalid email address.
5. Agree to the required terms and privacy policy checkbox.
6. Click **Continue**.

Expected Result:

The system should display an email validation error. The user should not be allowed to continue until a valid email address is entered.

TC-14: Verify Product Quantity Minimum Boundary

Type: Boundary - Edge Test Case

Preconditions:

The user is on a product listing page or product details page.

Test Data:

Product: Hummingbird printed t-shirt , Quantity: 1

Steps:

1. Open the Clothes category page.
2. Locate Hummingbird printed t-shirt.
3. Keep the quantity as **1**.
4. Add the product to the cart.
5. Open the cart page.

Expected Result:

The system should accept quantity **1** as the minimum valid quantity. The product should be added to the cart with quantity 1 and the correct unit price.

TC-15: Verify Product Quantity Maximum Boundary Validation

Type: Boundary Test Case

Preconditions

The user is on the PrestaShop store product listing page or Clothes category page.

The product **Hummingbird printed t-shirt** is visible.

Test Data

Product: Hummingbird printed t-shirt

Size: S

Color: White

Maximum Allowed Quantity: 297

Boundary Values:

Quantity 296

Quantity 297

Quantity 298

Steps

1. Open the PrestaShop demo store.
2. Navigate to the Clothes category page.
3. Locate the product Hummingbird printed t-shirt.
4. Select the product options:
 - Size: S
 - Color: White
5. Enter the quantity as 296.
6. Click the Add to Cart button.
7. Verify whether the product is added to the cart successfully.
8. Remove the product from the cart or reset the cart.
9. Enter the quantity as 297.
10. Click the Add to Cart button.
11. Verify whether the product is added to the cart successfully.
12. Remove the product from the cart or reset the cart.
13. Enter the quantity as 298.
14. Click the Add to Cart button.
15. Observe the validation message displayed by the system.

Expected Result

The system should allow the user to add **296 units** because it is below the maximum allowed quantity.

The system should allow the user to add **297 units** because it is the maximum valid quantity.

The system should not allow the user to add **298 units** because it exceeds the available stock limit.

For quantity **298**, the system should display a validation message similar to - “You can only buy 297 ‘Hummingbird printed t-shirt: Color - White, Size - S’. Please adjust the quantity in your cart to continue.”

The cart quantity and total price should not be updated with the invalid quantity **298**.
